INTRODUCTION

MICROLOG is an index and document delivery system providing access to current Canadian report literature of reference value from government and institutional sources.

The MICROLOG Index is a monthly publication providing citations to all reports located by our editorial staff.

The document delivery service supplies most of these documents to subscribers on either microfiche or paper. Titles available on fiche are indicated in the Index by a MICROLOG number. When xerographic paper copy is not available the symbol “*” appears under the citation.

PUBLICATIONS INCLUDED

MICROLOG includes Canadian federal, provincial and local government publications. Also included are publications of non-government research institutions, professional associations and special interest groups.

The primary criterion for inclusion is reference value; therefore research papers and studies are cited, while news releases and general information pieces are not. Annual reports, statistical reviews and financial statements are the only serials appearing in the Index.

MICROFICHE SUBSCRIPTIONS AVAILABLE

Documents from MICROLOG are available on microfiche through various subscription plans ranging from the complete collection to subsets by level of government, geographic area or subject. Part IV of the Index, the microfiche collections, is in fiche format and is located in the pocket at the back of the volume.

USING THE MICROLOG INDEX

The MICROLOG Index is divided into four parts: Main Entry Section, Subject Section, Title Section, and Microfiche Collections. The Index is bilingual.

MAIN ENTRY SECTION

This section lists all publications by main entry according to AACR2 rules with modifications required for a concise, easy-to-use index. Added entries for individual and corporate authors and for series are included.

SUBJECT SECTION

All documents in the Main Entry Section are analysed in this section. Items are listed under subjects by title and main entries are noted in parentheses for easy reference to the main entry section.

TITLE SECTION

For additional points of access most documents are listed by title and by series title with main entries in parentheses.

MICROLOG est un index et un système de livraison de documents donnant accès aux rapports canadiens courants, provenant de sources gouvernementales et institutionnelles, et ayant une valeur en tant que référence.

L'index MICROLOG est une publication mensuelle mentionnant tous les rapports trouvés par notre personnel de rédaction.

Le service de livraison de documents fournit aux abonnés un grand nombre de ces documents sur microfiche et sur papier. Les titres qui sont disponibles sur microfiche sont indiqués dans l'index grâce à un numéro d'entrée de document. Si une copie xérogaphique sur papier n'est pas disponible, le symbole “*” figure au dessous de l'entrée.

PUBLICATIONS TRAITÉES

MICROLOG inclut les publications du gouvernement fédéral canadien, des gouvernements provinciaux et des administrations municipales. Il traite également les publications des institutions de recherche non-gouvernementales, des associations professionnelles et des groupes d'intérêt particulier.

Le critère principal de l'inclusion est la valeur en tant que référence; ainsi, les articles et les études de recherche y figurent, tandis que les communiqués et la documentation d'intérêt général n'y figurent pas. Les rapports annuels, les périodiques de statistiques et les états financiers sont les seules publications périodiques qui figurent dans l'index.

ABONNEMENTS AUX MICROFICHES

Les documents de MICROLOG sont disponibles sur microfiche, et ceci, selon de divers programmes d'abonnement, de l'abonnement à la collection complète aux abonnements partiels par gouvernement, par région géographique et par matière. La 4^e partie de l'index, les collections de microfiche, est disponible sur microfiche et se trouve dans la poche à la fin de ce volume.

UTILISATION DE L'INDEX MICROLOG

L'index MICROLOG se divise en quatre parties, la Section des inscriptions principales, la Section des matières, la Section des titres, et Collections de microfiche. L'index est bilingue.

SECTION DES INSCRIPTIONS PRINCIPALES

Cette section énumère toutes les publications par entrée principale, selon les règles de RCAA2 modifiées pour produire un index concis et facile à utiliser. Elle comprend des entrées supplémentaires pour les auteurs particuliers, les collectivités-auteurs et les séries.

SECTION DES MATIÈRES

Tous les documents traités dans la section des inscriptions principales sont analysés dans la section des matières. Les documents se classent selon les matières et par titre; les inscriptions principales sont mentionnées entre parenthèses.

SECTION DES TITRES

Afin d'être plus accessible, la plupart des documents se présentent par titre et par série. Les inscriptions principales sont mentionnées entre parenthèses.

All microfilmed documents in this Index are available by individual order.
